ATTENTION RESIDENTS

March 22, 2023

This letter is a follow-up to the letter from the Village dated March 15, 2023 regarding well drilling on a property within 100m of your property or residence.

The drilling process is proceeding as planned, with development going well. At this time the drillers are waiting for screens to arrive prior to returning to develop the first well drilled and begin drilling a second well. We now anticipate the drillers returning on Monday, March 27 and working on site for approximately 8 consecutive days. Working through the weekend of March 25 – 26 is the most efficient approach and therefore preferred.

The anticipated timeline remains the same otherwise (4-6 weeks from Monday, March 13), with drilling taking place between 7 a.m. and 7 p.m. on weekdays and from 8:00 a.m. to 5:00 p.m. on weekends. No drilling will take place on statutory holidays.

As always, if you have any questions, please contact the Village office using the contact information provided below.
